Dear awesome sound/production/stage person,

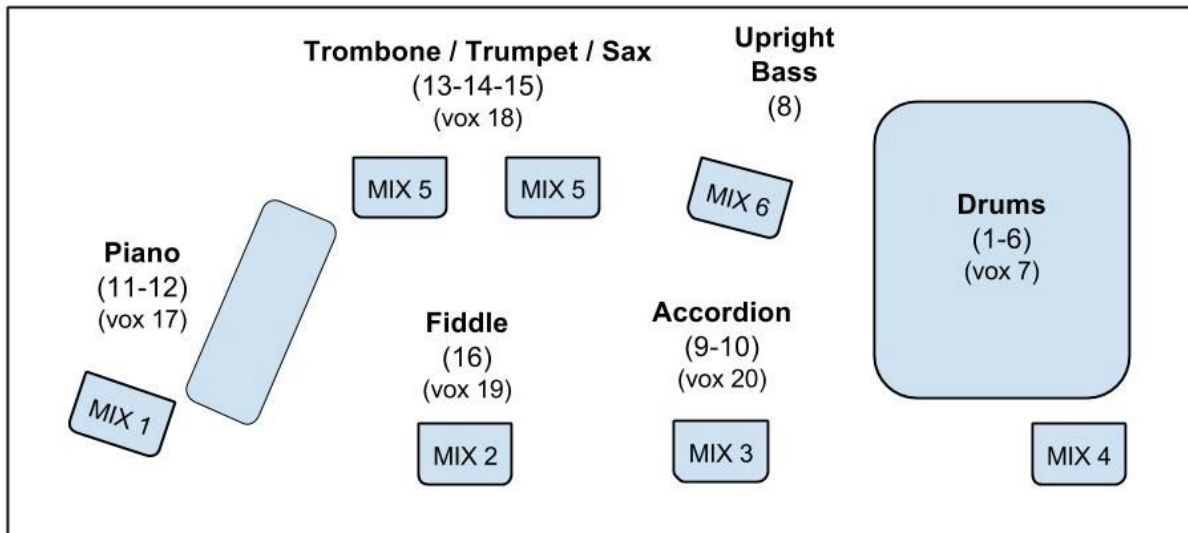

I hope you will enjoy this Habade-tech-rider. It's here to make your life easy and comfortable - just like a nice warm coat - so please take your time and read the following 108 words:

We bring our own rack-mixer (x32 rack) that lives next to the stage in patch world. It's ipad/wifi controlled, so it doesn't take up space in FOH, and **no need for cat-5**.

Since we travel light, we kindly ask (require) you (the venue) to provide xlr looms for **all audio signals** going in and out of our system:

- 20 input channels.
- 8 outputs (L/R + 6 monitor sends)

For no-soundcheck-only-line-check-shows, we kindly ask (require) you (the venue) to split the inputs, in order for us to mix FOH on our own system, and have the **awesome, in-house monitor tech** take care of monitors with the venue system.

If you have printed this rider in colors, you quickly can determine which microphones we bring along (green) and which you provide (red)... oh wait... if you are colorblind then i'm terribly sorry.

#	Input	Mic/Di
1	Kick	Sennheiser 901 or Beta 91A
2	Snare	Beta 57A
3	Hat	Condenser
